The Difference

From the moment you engage Fleisher Forensics, we focus on you and your matter. Throughout the process we speak with you to identify and advise of the strengths, weaknesses and challenges of any case. We look at matters from both sides; our experience allows us to understand the full picture.

At Fleisher Forensics, we provide expertise for litigation matters in the built environment, products liability, automotive industry, and more. We are experienced in working on matters of all levels of complexity, visibility and scrutiny. We are seasoned professionals; engineers, architects, construction managers and scientists, with exceptional experience, unparalleled expertise and a proven track record of success.
